What you must tell us before the policy begins

Before You enter into this policy of insurance, You are required under the Insurance Contracts Act 1984 to disclose to us every matter that You know, or could reasonably be expected to know, that is relevant to the insurer's decision whether to accept the risk of insurance and if so, on what terms.

However, Your duty does not require disclosure of any matter:

- that diminishes the risk;
- that is of common knowledge;
- that the insurer knows or in the ordinary course of its business, ought to know; or
- as to which compliance with Your duty of disclosure is waived by the insurer.

As we rely on the information you provide, if it is not accurate, we can reduce or deny any claims you make or cancel your policy which is something we never want to do therefore please see sections 6, 7, 8, and 9 of the Policy Conditions for specific information you must disclose to us.

More than one policyholder

If more than one person owns the building protected by an authorised termite management system, then all of the owners should be named on this policy. Each person is a joint policyholder and we will treat a statement, act, omission, claim or request to cancel your policy within the cooling off period made by one policyholder as if it came from all those named as insured on the Policy Certificate.

Important definitions

Some words within the Policy Conditions have limited or specialist meanings. Most of these words are listed in section 28 of the Policy Conditions.

overview of cover

This section provides a summary of what is covered by this Policy.

Timber damaged by a new termite infestation

After the policy begins if termites from a new infestation are found inside the protected building, we will cover the cost of repairing or replacing timber damaged by those termites.

We will not cover the cost of repairing or replacing timber damaged by termites that existed before the policy begins, or caused by an infestation present at the time the policy begins.

More details see sections 1 and 4 of the Policy Conditions.

Investigating the extent of termite damage

In some cases we may need to determine the extent of damage before appropriate tradesmen can be instructed to complete necessary works.

More details see section 1 of the Policy Conditions.

Alternative accommodation during repairs

In some situations you may need to move into alternative accommodation during repairs.

More details see section 1 of the Policy Conditions.

summary of important claims information

This is a summary only of important information to be aware of when making a claim.

More information see sections 14 and 15 of the Policy Conditions.

Making a claim

Once termites are discovered inside the protected building it is important for the termites to be treated by an accredited technician in order to minimise the extent of timber damage.

It is important to contact us as soon as possible after you discover termites inside the protected building.

Assessing the loss

A builder will need to provide a quotation to repair or replace timber damaged by the new termite infestation. Generally, we will instruct the builder and therefore you should talk to us before spending any money investigating the extent of termite damaged timbers.

Excess

There is no excess payable.

Settling claims

Depending on these circumstances, we will decide to instruct tradesmen or pay you what it would cost to repair or replace the termite damaged timber.

What happens if the repairs are more than \$100,000?

You are responsible for any repairs above \$100,000. We will discuss with you how to proceed in the unlikely event that it occurs.
